PROFESSIONAL SUMMARY

Platform Solutions Strategist — $50M+ in enterprise revenue driven through technical integration architecture and solutions engineering methodology. Day-to-day lead for the largest advertiser in America across 16 LOBs at a programmatic high-impact company, winning by solving deep technical challenges — DSP migration, AWS Clean Room architecture, creative-to-trafficking automation — that no competitor could crack. Built production AI systems on AWS and GCP (75%+ efficiency gains). Perplexity AI Business Fellow (2025).

TECHNICAL & AI COMPETENCIES

Integration: DSP/SSP Integration Architecture | AWS Clean Room | API Design & Data Schema Mapping | Creative-to-Trafficking Automation | Bulk Upload Pipelines
AI & Dev: Claude | Claude Code | Anthropic API | Google Gemini | Agentic Workflows | MCP Server Architecture | Python | Prompt Engineering
Cloud & Data: AWS (Clean Room, S3, IAM) | Google Cloud Platform | Snowflake | ETL Pipelines | Third-Party Tag Wrapping | Taxonomy Mapping
Solutions: Technical Discovery | Solution Architecture | POC Development | Value Engineering | Client Training & Onboarding | ROI Articulation
Methods: Consultative Selling | Enterprise Sales Cycles | Multi-Stakeholder Technical Evaluations | C-Level Engagement | Cross-Functional Coordination

PROFESSIONAL EXPERIENCE

KARGO — Programmatic High-Impact Creative Company | Amazon Account
Enterprise Account Executive | April 2025 – February 2026

- $17.5M revenue (2025), 100%+ quota every quarter (104–126%). Won business through deep technical integrations — DSP migration architecture, Clean Room implementation, API-level activation — that competitors with larger teams could not solve
- Architected AWS Clean Room solution end-to-end: technical discovery with client data engineering teams, schema mapping protocols, API integrations, bulk upload pipeline design, and full client onboarding — $6.5M in new revenue Year 1
- Built creative-to-trafficking automation pipeline: asset ingestion → creative approval → third-party tag wrapping → taxonomy mapping → DSP bulk upload. Reduced a multi-day manual process to a streamlined, scalable system
- Opened first-to-market 3P tagged programmatic channel through custom integration architecture — designed solution, built technical demo, and delivered across Streaming TV, OEM, OLV, and Display
- Ran multi-stakeholder technical evaluations across 16 LOBs, agency technology teams, and brand data engineering groups. Acquired 8 new LOBs through consultative, solutions-led selling
- Built production AI tools using Claude, Gemini, and agentic workflows — including Creative Approval Platform on GCP integrating Gemini API and Google Workspace APIs (75%+ reduction in manual QA time)

Associate Director / Senior Client Services Manager | September 2022 – March 2025

- $30M+ book of business over two years, 95% client satisfaction. Served as technical solutions lead for enterprise accounts requiring complex integrations, API configurations, and platform onboarding
- Managed team of 7 through full solution lifecycles: technical discovery → integration scoping → solution design → deployment → client training. 15% operational efficiency gain across all accounts
- Developed deep operational expertise executing DSP trafficking, creative activation, and data workflows manually — this hands-on knowledge became the foundation for every technical solution and automation built later

ZENITH MEDIA GROUP (PUBLICIS) | Los Angeles, CA
Media Supervisor (Client: Disney+) | July 2021 – September 2022

- Designed scalable operational processes and technical frameworks adopted across all Disney+ US business lines. Coordinated cross-functional teams spanning Programmatic, Digital, Social, Amazon Search, Broadcast, and OOH
- Drove programmatic video buying strategy across title launches and always-on campaigns. Presented CTV/streaming investment strategy and technical performance benchmarks to senior leadership

MEDIACOM (GROUPM) | Los Angeles, CA
Senior Media Planner (Client: adidas) | August 2019 – July 2021

- $80MM+ annual programmatic budget across 14+ business units. Partnered with Amazon technology team on product discovery and platform integration initiatives. Led team of 2 assistant planners

HEARTS AND SCIENCE (OMNICOM) | Los Angeles, CA
Associate Media Planner (Client: AT&T) | May 2018 – August 2019

- Managed integrated media execution across AT&T's enterprise portfolio spanning direct I/O, programmatic, and emerging digital channels. Coordinated with 5+ cross-functional teams on campaign delivery

AI PROJECTS & TECHNICAL PORTFOLIO

Creative Approval Platform (GCP + Gemini): Production AI tool integrating Gemini API with Google Workspace for automated creative review and DSP trafficking QA — 75%+ reduction in manual QA time
Campaign Automation Suite (Claude + Agentic): AI-powered campaign setup, QA, and optimization using Claude, custom prompts, and multi-step agentic workflows with human-in-the-loop validation
Retail Media Analytics Dashboard: 7-level enterprise analytics platform with drill-down from portfolio to line-item performance. Built with React, Recharts, and Tailwind CSS
Real-Time Data Pipeline: Autonomous ETL system with fuzzy entity resolution, Playwright-based data collection, and GitHub Actions orchestration for live tournament data ingestion
AWS Clean Room Implementation: End-to-end enterprise data integration: schema mapping protocols, API integration specs, bulk upload pipeline design, and client training documentation

EDUCATION & CERTIFICATIONS

Perplexity AI Business Fellowship (2025) — Advanced AI practitioner for enterprise applications
Indiana University, Kelley School of Business — Bloomington, IN | BA Telecommunications, Minor: Business Administration | 2012–2016
