PROFESSIONAL SUMMARY

Enterprise Solutions Architect — $50M+ in enterprise revenue through technical integration architecture and solutions engineering methodology. Led the largest advertiser across 16 LOBs, winning through deep technical challenges — DSP migration, AWS Clean Room architecture, creative-to-trafficking automation — that no competitor could solve. Deployed production AI systems on AWS and GCP (75%+ efficiency gains). Deep knowledge of DSP, SSP, CDP, and real-time bidding infrastructure across programmatic, CTV, and media distribution ecosystems.

TECHNICAL & AI COMPETENCIES

Architecture: DSP/SSP Integration Architecture | AWS Clean Room | Real-Time Bidding Infrastructure | Content Recommendation Systems | Audience Data Platforms | API Design & Schema Mapping
AI & Engineering: Production Python Pipelines | ML Model Orchestration | Claude | Anthropic API | Google Gemini | Agentic Workflows | MCP Server Architecture | Data Processing Optimization
Cloud & Data: AWS (Clean Room, S3, IAM) | Google Cloud Platform | Snowflake | Distributed Data Systems | Model Deployment at Scale | ETL Pipelines | Taxonomy Mapping
Solutions: Technical Discovery | Solution Architecture | POC Development | Value Engineering | Technical Collateral Development | Executive Workshops | Client Onboarding
Methods: Consultative Technical Advisory | Complex Enterprise Engagements | Multi-Stakeholder Evaluations | C-Level Engagement

PROFESSIONAL EXPERIENCE

KARGO — Programmatic High-Impact Creative Company | Amazon Account
Enterprise Account Executive | April 2025 – February 2026

- $17.5M revenue (2025), 100%+ quota every quarter (104–126%). Won business through deep technical integrations — DSP migration architecture, Clean Room implementation, API-level activation — that competitors with larger teams could not solve
- Architected AWS Clean Room solution end-to-end: technical discovery with client data science and engineering teams, schema mapping protocols, API integrations, bulk upload pipeline design, and full client onboarding — $6.5M in new revenue Year 1
- Built creative-to-trafficking data processing pipeline: asset ingestion → creative approval → third-party tag wrapping → taxonomy mapping → DSP bulk upload. Reduced a multi-day manual process to a streamlined, scalable system
- Opened first-to-market 3P tagged programmatic channel through custom integration architecture — designed solution, built technical demo, and delivered across Streaming TV, OEM, OLV, and Display
- Ran multi-stakeholder technical evaluations across 16 LOBs, agency technology teams, and brand data engineering groups. Acquired 8 new LOBs through consultative, solutions-led selling
- Deployed production AI models using Claude, Gemini, and agentic workflows — including Creative Approval Platform on GCP integrating Gemini API for automated content classification and Google Workspace APIs (75%+ reduction in manual QA time)

Associate Director / Senior Client Services Manager | September 2022 – March 2025

- $30M+ book of business over two years, 95% client satisfaction. Served as technical solutions lead for enterprise accounts requiring complex integrations, API configurations, and platform onboarding
- Managed team of 7 through full solution lifecycles: technical discovery → integration scoping → solution design → deployment → client training. 15% operational efficiency gain across all accounts
- Developed deep operational expertise executing DSP trafficking, creative activation, and data workflows manually — this hands-on knowledge became the foundation for every technical solution and automation built later

ZENITH MEDIA GROUP (PUBLICIS) | Los Angeles, CA
Media Supervisor (Client: Disney+) | July 2021 – September 2022

- Designed scalable operational processes and technical frameworks adopted across all Disney+ US business lines. Coordinated cross-functional teams spanning Programmatic, Digital, Social, Amazon Search, Broadcast, and OOH
- Drove programmatic video buying strategy across title launches and always-on campaigns. Presented CTV/streaming investment strategy and technical performance benchmarks to senior leadership

MEDIACOM (GROUPM) | Los Angeles, CA
Senior Media Planner (Client: adidas) | August 2019 – July 2021

- $80MM+ annual programmatic budget across 14+ business units. Partnered with Amazon technology team on product discovery and platform integration initiatives. Led team of 2 assistant planners

HEARTS AND SCIENCE (OMNICOM) | Los Angeles, CA
Associate Media Planner (Client: AT&T) | May 2018 – August 2019

- Managed integrated media execution across AT&T's enterprise portfolio spanning direct I/O, programmatic, and emerging digital channels. Coordinated with 5+ cross-functional teams on campaign delivery

AI PROJECTS & TECHNICAL PORTFOLIO

Creative Approval Platform (GCP + Gemini): Production AI tool integrating Gemini API with Google Workspace for automated creative review and DSP trafficking QA — 75%+ reduction in manual QA time
ML-Orchestrated Campaign Pipeline (Python): Multi-model AI orchestration system with Python-based agentic pipelines, inference routing across Claude and Gemini, and human-in-the-loop validation for campaign optimization
AdTech ML Workflow Automation (Python): Pipeline orchestrating multiple AI models for real-time content classification, audience segmentation, and campaign performance prediction across programmatic ecosystems
AWS Clean Room Implementation: End-to-end enterprise data integration: schema mapping protocols, API integration specs, bulk upload pipeline design, and client training documentation

EDUCATION & CERTIFICATIONS

Perplexity AI Business Fellowship (2025) — Advanced AI for enterprise | 10+ years AdTech solutions architecture equivalent experience
Indiana University, Kelley School of Business — Bloomington, IN | BA Telecommunications, Minor: Business Administration | 2012–2016
