Solutions Selling: Technical Discovery | Solution Architecture | POC Development | Platform Implementation | Value Engineering | ROI Articulation
Methodologies: Consultative Selling | MEDDIC | Enterprise Sales Cycles | C-Level Engagement | Multi-Stakeholder Coordination

PROFESSIONAL EXPERIENCE

KARGO — Los Angeles, CA [Enterprise ad tech platform on AWS serving Fortune 500 brands]

Enterprise Account Executive: Solutions Consultant (Amazon) | April 2025 – February 2026

- Delivered $17.5M in platform revenue (2025) with 100%+ quota attainment every quarter (104%-126%), driving enterprise adoption through technical discovery, solution architecture, and consultative solution design
- Built production AI automation tools using Claude, Claude Code, and agentic workflows, including a Creative Approval Platform on GCP integrating Gemini AI and Google Workspace APIs that reduced campaign QA time by 75%+
- Architected end-to-end AWS Clean Room solution for enterprise platform migration: led technical discovery with client data engineering teams, designed schema mapping protocols, coordinated API integrations, and managed full onboarding — driving $6.5M in new platform revenue Year 1
- Pioneered first-to-market platform integration positioning Kargo as premier technology partner, requiring custom solution architecture, POC delivery, and technical demonstrations for enterprise stakeholders
- Translated complex platform capabilities into executive-level business cases with ROI analysis and value engineering, enabling non-technical stakeholders to accelerate enterprise sales cycles
- Coordinated multi-stakeholder technical evaluations across enterprise organizations, agency technology teams, and brand data engineering groups, managing solution requirements across 8 new LOBs

Associate Director / Senior Client Services Manager | September 2022 – March 2025

- Managed $30M+ in platform implementation revenue with 95% client satisfaction, serving as technical solutions consultant for enterprise accounts requiring complex API integrations and platform configurations
- Led team of 7 through full implementation lifecycles including technical discovery, solution design, POC development, and client onboarding, improving operational efficiency by 15%
- Developed technical training curriculum for enterprise clients on platform capabilities, API usage, and integration best practices, accelerating time-to-value and platform adoption

ZENITH MEDIA GROUP (PUBLICIS GROUPE) — Los Angeles, CA

Media Supervisor — Client: Disney+ | July 2021 – September 2022

- Designed scalable platform processes and operational frameworks implemented across all Disney+ US business lines, demonstrating solution architecture capabilities for enterprise deployments
- Coordinated cross-platform technology teams for integrated solution delivery across multiple enterprise systems, managing technical requirements across $15M+ quarterly implementations

MEDIACOM (GROUPM) — Los Angeles, CA

Senior Media Planner — Client: adidas | August 2019 – July 2021

- Managed $80MM+ annual technology platform budget across 14+ business units, partnering with Amazon technology team on product discovery solutions and platform integration initiatives

HEARTS AND SCIENCE (OMNICOM) — Los Angeles, CA

Associate Media Planner — Client: AT&T | May 2018 – August 2019

- Coordinated cross-functional stakeholders to align technology solutions with business objectives and implementation requirements across enterprise platform ecosystem

AI PROJECTS & TECHNICAL PORTFOLIO

Creative Approval Platform (GCP + Gemini): Production AI tool integrating Gemini API with Google Workspace for automated creative review — 75%+ reduction in manual QA time
Campaign Automation Suite (Claude + Agentic): AI-powered automation tools for campaign setup, QA, and optimization with custom prompts and agentic workflows
AWS Clean Room Implementation: End-to-end enterprise data platform migration with schema mapping protocols and API integration specifications
